Appln No. 10/760275
Amdt. Dated: December 21, 2006
Response to Office Action of October 19, 2006   4

The paragraph beginning at Page 25, lines 3 - 6, is to be amended as follows:

Referring now to Figure 40, the first step of the ink refilling procedure is initiated by refill sensor 35 indicating to controller board 82 that there is a deficiency of printing fluid in storage reservoirs 28, 30, 32, 34. In response to the signal from the refill sensorink-cartridge QA chip that the ink is nearly depleted, controller board 82 activates indicator LED 138 to inform the user that another refill is necessary.
